

# Premium RV Skirting Material

When EZ Snap™ developed this winterizing RV skirting kit, we wanted to use the very best material we could find for the application. All of our skirting products are made using **Diamond Weave™** premium skirting vinyl.

**Diamond Weave™** is a very strong and durable vinyl with half the storage bulk of regular RV skirting. The secret to **Diamond Weave's™** strength is its diamond shaped, interlaced scrim base. This allows for it to remain lightweight while still having durability in extreme weather conditions. Our skirting material is also a (Triple-Coated) material, for extra durability.

The **Diamond Weave™** RV skirting material is able to withstand temperatures to **-40 degree** winter conditions. It's also able to handle the extreme summer temperatures in places like **Arizona**.

**Diamond Weave™** RV skirting is a "Non-Fray" material like our shade screen mesh. It features an encapsulated yarn built right into the base fabric. This is a great feature as it allows Do-it-yourselfers could cut the fabric on-site without the need for hemmed edges.

**Diamond Weave™** RV skirting has a proven track record of outstanding performance in all climates. Wherever you do decide to buy your RV skirting or 5th wheel skirting from, insist that they use the **Diamond Weave™** RV skirting material for long life and durability.

**Diamond Weave™** RV skirting also has a fire retardant rating. Most of our competitors don't. Get peace of mind and sleep worry free. If using heaters underneath your skirting, this is an absolute, must-have feature.

# UV & Mould Inhibitors

Diamond Weave™ RV skirting has the maximum amount of U.V. ray and fade inhibitors, as well as mould and mildew inhibitors and **-40 cold weather performance rating**.

We know you will be very pleased with its performance. Even though the EZ Snap™ RV Skirting is much less expensive than a professionally installed skirting, the quality of the finished product will be as good, if not better than the material an upholstery shop would install.

White is the most popular color for our skirting product, but it is also available in the colors shown below:
